

## DataHub

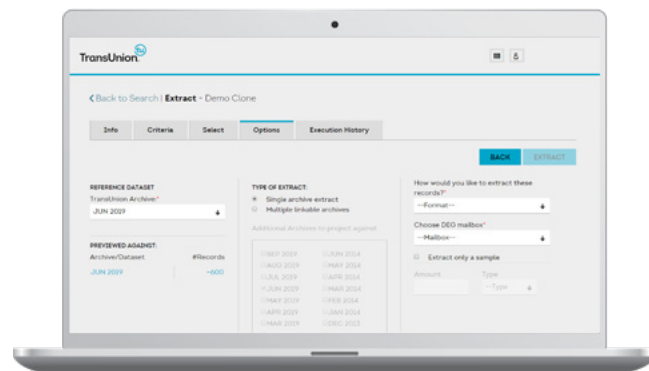

Quickly obtain data to support your own analytics – in your environment, with your preferred tools.

- ✔ Swiftly query and extract 20 years of depersonalized, archive credit data
- ✔ Input your own customer data, or other third-party data, to define and refine the extract population
- ✔ Receive the dataset, typically within 24 hours<sup>1</sup>
- ✔ Query TransUnion depersonalized archive credit data via self-service, on-demand, point-and-click access
- ✔ Query on and obtain CreditVision® data, enriched attributes, models and scores, VantageScore® 3.0 and VantageScore® 4.0 as part of the extract
- ✔ Append and extract highly relevant datasets for analysis in your own environment

The pace of business continues to quicken, requiring the rate at which you make decisions to increase as well. To do this effectively, you need access to data — faster than most traditional services can provide.

### Prama DataHub enables analysts to solve even the most complicated analyses:

- Acquisition
- Account management
- Model development, testing and validation
- New business/segment expansion
- Portfolio valuation
- Pre-recession analysis
- Reject inference
- Risk management
