

# Improve Operations with Efficient 1099 Tax Form Updates

Hiring holiday season temporary workers is key to supporting increased demand. But locating them again during tax season – after they’ve moved or returned to college – could be costing you time and resources. If your human resources or operations team is spending hours or days to update addresses, TransUnion can help with tools to quickly access accurate address information.

## How Batch Processing Works

TransUnion filters each subject through a vast data repository of billions of records from thousands of data sources, and then delivers multiple reports in one efficient file – usually within hours.\* With batch processing, you can process thousands of records – day or night – in a single inquiry, making the process even faster.

By filtering contacts through our massive data repository, our batch offering locates and returns updated address information about your holiday season contractors.

## Benefits of Using Batch Processing for 1099 Form Updates

- ✓ Reduce manual searches for the most up-to-date addresses
- ✓ Receive completed files quickly and efficiently
- ✓ Custom solutions are available to meet the unique needs of your business

## Prepare Now for Tax Form Deadlines

As the deadline for sending 1099 tax forms to holiday season contractors approaches, prepare now for how you’ll update addresses. TransUnion TLOxp<sup>®</sup> batch processing solution can make validating and updating addresses before you send out 1099s faster and easier. Contact us today to learn more.

\*While unlikely, there may be instances where results may not be delivered instantly, in real-time or in seconds due to factors outside of TransUnion Risk and Alternative Data Solutions’ reasonable control, including any force majeure event or customer internet access problems.
