

APRIL 2024

Credit Industry Snapshot

Executive Summary

TransUnion's April Credit Industry Snapshot saw serious consumer-level delinquencies decline across products for the second consecutive month – while balance growth was mixed. The recent decline in delinquency rates was primarily due to seasonal factors like tax return season; however, they did remain elevated in long-term comparisons across most products.

The US economy expanded 1.6% in Q1 2024, driven largely by consumer spending – which has been helped by strength in the job market that's continued to produce positive job growth and a low unemployment rate. The US economy has now produced 40 consecutive months of positive job growth as a total of 175,000 jobs were created in April. In addition, the unemployment rate (3.9%) has remained below 4% for 27 consecutive months.

While economic growth and job market strength have been positive, consumers continue to be pressured by elevated levels of inflation. The Consumer Price Index (CPI) ended April at 3.4%, remaining well above the Federal Reserve's 2% target rate. With inflation problematic, interest rates are apt to remain higher for longer. The Fed signaled earlier in the year interest rate cuts were likely in 2024, but their likelihood and potential timing have been called into question due to the stickiness of inflation in recent CPI reports.

Economic concerns impacted the University of Michigan's Index of Consumer Sentiment which ended April at 77.2. While consumer sentiment has trended higher over the past year, the index remains well below its long-term average (85.3) due to inflation and economic concerns.

TransUnion continues to deliver insights on consumer credit trends to help guide lending strategies. Month-over-month comparison highlights from our April 2024 report include:

Overall:

- Serious delinquency rates declined across all products, marking the second consecutive month of decline
- Average balance per consumer increased for bankcard while decreasing for unsecured personal loan
- Average balance per account increased for mortgages
- Average new loan amounts decreased for auto and unsecured personal loans

Auto

- Consumer 30+DPD decreased to 3.76% (-11 bps); 60+DPD decreased to 1.38% (-12 bps)
- Average amount financed decreased to \$28,781 (from \$29,131)

Bankcard

- Consumer 30+DPD decreased to 4.33% (-20 bps); consumer 60+DPD decreased to 3.17% (-14 bps); consumer 90+DPD decreased to 2.41% (-8 bps)
- Average balance per consumer increased to \$6,201 (from \$6,189)
- Average credit line per consumer increased to \$26,674 (from \$26,635)

Mortgage

- Consumer 30+DPD decreased to 2.17% (-18 bps); 60+DPD decreased to 1.04% (-10 bps); 90+DPD decreased to 0.71% (-3 bps)
- Average balance per account increased slightly to \$225,218 (from \$225,152)

Unsecured Personal Loan (UPL)

- Consumer 60+DPD decreased to 3.50% (-19 bps)
- Average new account balance decreased to \$7,229 (from \$7,500)
- Average balance per consumer decreased to \$11,835 (from \$11,989)

Please note: Auto historical and current metrics have been restated to exclude irregular reporting from a data furnisher.

The above insights are based on TransUnion research data. If you have questions about the Monthly Credit Industry Snapshot report or how to use this information, please contact your TransUnion representative.

Indicator	Q1 2024	Q4 2023	% Change	Q1 2023	% Change
GDP	1.6%	3.4%	-1.8%	2.0%	-0.4%

Note: For metrics reported in percentage terms (Unemployment, Consumer Price Index, etc), their month-over-month and year-over-year changes reflect the change in percentage, not the percentage change.

Macroeconomic Indicators and Definitions

All macroeconomic indicators are retrieved from the Federal Reserve Economic Data (FRED) at fred.stlouisfed.org. This data is utilized within the Credit Industry Snapshot to provide a macroeconomic view of recent trends in the industry. The indicators and their definitions are as follows:

Building Permits:

This metric tracks the increase or decrease in requests for building permits.

Consumer Confidence Index:

This metric provides an indication of future developments of households' consumption and saving based upon answers regarding their expected financial situation, sentiment about the general economic situation, unemployment and capability of savings. An indicator above 100 signals a boost in the consumer's confidence toward the future economic situation, as a consequence of which they're less prone to save and more inclined to spend money on major purchases in the next 12 months. Values below 100 indicate a pessimistic attitude toward future developments in the economy, possibly resulting in a tendency to save more and consume less.

Consumer Sentiment Index:

This is a monthly survey of consumers which is used to estimate future spending and saving.

GDP (Quarterly):

The real gross domestic product is the inflation adjusted value of the goods and services produced by labor and property located in the United States.

Hourly Wages:

The average hourly wages for all employees is tracked by this metric.

Housing Starts:

Housing starts occur when excavation begins for the footing or foundation of a building. All housing units in a multifamily building are defined as being started when this excavation begins. Beginning with data for September 1992, estimates of housing starts include units in structures being totally rebuilt on an existing foundation.

Labor Participation Rate:

This metric is an indicator of our economy's active workforce. Its formula is the sum of all workers (employed or actively seeking employment) divided by the total non-institutionalized, civilian, working-age population.

Manufacturing Activity:

As its name implies, this metric tracks manufacturing activity within the U.S. This metric does not include capital goods related to defense.

New Business Startups (Quarterly):

This metric displays the total of all applications for an Employer Identification Number (EIN). This includes all applications for an EIN, except applications for tax liens, estates, trusts, or certain financial filings, applications outside of 50 states and DC or with no state county geocodes, applications with a NAICS sector code of 11 (agriculture, forestry, fishing and hunting) or 92 (public administration), and applications in certain industries (e.g., private households, civic and social organizations).

Producer Price Index:

This measures the average change over time in the selling prices received by domestic producers of goods and services. PPIs measure price changes from the perspective of the seller. This contrasts with other measures, such as the Consumer Price Index (CPI), which measure price changes from the purchaser's perspective.

Stock Market Volatility:

This indicator measures market expectation of near-term volatility as conveyed by stock index option prices.

Unemployment:

The unemployment rate represents the number of unemployed as a percentage of the labor force. Labor force data are restricted to people 16 years of age and older, who currently reside in 1 of the 50 states or the District of Columbia, who do not reside in institutions (e.g., penal and mental facilities, homes for the aged), and who are not on active duty in the Armed Forces.

Weekly Initial Claims (Four-Week Moving Average):

This metric tracks the number of people who have filed for unemployment during the week. We've adjusted this for the Credit Industry Snapshot to capture a four-week moving average.

Glossary of Terms/Metrics

The following contains the **glossary of terms** for the Credit Industry Snapshot:

Aggregate Excess Payment (AEP):

This is an important metric developed by TransUnion as an additional measure to gauge a consumer's credit strength (beyond credit score). The AEP is utilized to measure how much in additional or 'excess' payments a customer is making beyond their minimum due. For example, a consumer may owe a minimum of \$500/month across their wallet for their credit card, auto, mortgage, etc.

1. If a consumer is actually paying \$700/month toward these bills, their AEP would be +200.
2. If a consumer pays \$500/month, their AEP would be 0.
3. In general, the higher the AEP, the higher the likelihood the customer is in good financial standing and vice versa.

LOB:

This represents 'lines of business.'

Risk Tiers:

System of ranking the overall risk score of individual consumers based upon their credit history. Risk tiers at TransUnion include the following VantageScore® 4.0 categories (listed in order of credit quality):

- Super prime (781-850)
- Prime plus (721-780)
- Prime (661-720)
- Near prime (601-660)
- Subprime (300-600)

The *lowest risk* tier would be super prime, as it has the highest credit score of the group. The *highest risk* tier is subprime, as it reflects the lowest credit score of the group.

The **glossary of metrics** for TransUnion's Credit Industry Snapshot is included as follows:

% of Borrowers 30+:

The percentage of borrowers who are 30 + days past due will be included in this metric.

% of Borrowers 60+:

This metric will track the percentage of borrowers who are 60+ days delinquent.

% of Borrowers 90+:

The percentage of borrowers who are 90+ days delinquent will be tracked by this metric.

Note: This does not include charge-off.

Average Account Balance:

This is the average balance for each account.

Average Balance Per Consumer:

Average total balance per consumer, of consumers with a balance.

Average Credit Line Per Consumer:

Average credit line per consumer, of consumers with a credit line.

Consumer Level 60+ Delinquency Rate:

This metric will include borrowers who are 60 days past due or higher.

Consumer Level 90+ Delinquency Rate:

This metric will include borrowers who are 90 days past due or higher.

Distribution of Delinquency:

This metric tracks the percentage of accounts that fall within each level of delinquency.

Lender Type – Banks:

Loans origination from banks are represented by this lender type.

Lender Type – Captive:

Captive lender types are generally referenced for auto. These lenders are typically located on-site at the dealership.

Lender Type – CU:

This represents 'credit unions' as the lender.

Lender Type – FinTech:

Those lenders employing advanced financial technologies to streamline/update traditional lending processes.

Lender Type – Traditional Finance Companies:

Lenders who do not accept deposits.

Median Account Balance:

This is the median balance for each account.

Median One Month AEP:

This metric represents the median consumer one month AEP (Average Excess Payment). The AEP is utilized to measure how much in additional or 'excess' payments a customer is making beyond their minimum due.

Product - Fannie:

This product type represents the Federal National Mortgage Association (FNMA). This is better known as Fannie Mae.

Product Type - FHA:

This represents the Federal Housing Administration. FHA insures mortgages on single family homes, multifamily properties, residential care facilities and hospitals.

Product Type - Freddie:

This product type represents the Federal Home Loan Mortgage Corporation, better known as Freddie Mac. Operating in the secondary mortgage market, 'Freddie' keeps mortgage capital flowing by purchasing mortgage loans from lenders so they can in turn provide more loans to qualified borrowers.

Product Type - Jumbo:

This product type represents those loans that exceed the dollar amount loan-servicing limits put in place by Freddie Mac and Fannie Mae. Another term of jumbo is non-conforming loans.

Product Type - USDA:

This product type represents non-traditional mortgages, such as zero-down-payment loans for rural and suburban homebuyers.

Product Type - VA:

This product type represents Veterans Administration (VA) loans. The VA loan is a \$0 down mortgage option available to veterans, service members and select military spouses.

Total Accounts by Lender Type:

The total number of accounts held within a particular lender type is tracked by this metric.

Methodology

It's important you have an understanding of how we're producing this report. The Snapshot includes data for the current month, as well as month-over-month (MoM) and year-over-year (YoY) comparisons for each line of business (LOB) and the metrics within those LOBs. Our methodology is detailed as follows:

1. TransUnion's Credit Industry Snapshot utilizes a stratified random sample of five million consumers obtained from TransUnion's Prisma® DataHub.
2. The random sample of consumers was validated against TransUnion's consumer credit database to match both VantageScore® 4.0 credit tier and state distributions of consumers.
3. This report analyzes all open accounts reported to TransUnion that have been verified in the past 10 years. All accounts not reported as closed with zero balance (as indicated with a closed date, an installment balance of zero, or a remark indicating a final status such as foreclosure or settlement) are included in the report's metrics.
