

**INVESTIGATE AND ALERT**

State Motor Vehicle Report

OVERVIEW

TransUnion TruLookup™ Motor Vehicle Report (MVR), available in TLOxp®, allows you to evaluate an individual's driving history to perform investigations, manage claims and detect fraud. You can better assess driver behavior or locate individuals by tapping into actionable insights from driving record data sourced from state Department of Motor Vehicles.

DATA INCLUDES:

- Accidents
- Driver information
- License points
- License classes
- License status (active/suspended/canceled/revoked)
- Traffic violations
- License endorsements
- License restrictions
- Out-of-state guilty violations*
- Suspensions and revocations

HARNESS THE POWER OF DRIVING RECORDS

- Uncover a recent history of citations, traffic violations, DUIs or other vehicular incidents that can provide better insight into driver behavior.
- Identify patterns, relationships and locations of an individual, refine searches and improve skip tracing.
- Detect fraud and assess risk more accurately and efficiently during the claims management and resolution process.
- Verify the identity of an individual by confirming their personal information as registered with the DMV.
- Review driving violations to identify violations that may typically be harder to discover.

SPEND ONLY ON THE MVRs YOU NEED

In addition to our MVR solution, the TruLookup Driving Violations – Person Search contains more robust coverage of driving violations, including traffic citations (both pre and post adjudication) at a significantly lesser cost compared to the Motor Vehicle Report. Using court record violation data and consumer matching logic, users can identify drivers with impactful violation activity and selectively order MVRs to optimize spend.

Driving Violations – Person Search can be used to find traffic citations, violations, violation dates and court dates for a subject. It returns up to the last seven years of driving violations issued to your subject.

Enjoy flexible access to superior data – how and when you need it.
