Federal Supply Service

Authorized Financial and Business Solutions (FABS) Schedule Price List for TransUnion LLC

About TransUnion

TransUnion is a leading global risk and information solutions provider to businesses and consumers. We provide consumer reports, risk scores, analytical services and decisioning capabilities to businesses. Businesses embed our solutions into their process workflows to acquire new customers, assess consumer ability to pay for services, identify cross-selling opportunities, measure and manage debt portfolio risk, collect debt, verify consumer identities and investigate potential fraud. Consumers use our solutions to view their credit profiles and access analytical tools that help them understand and manage their personal information and take precautions against identity theft.

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage, a menu driven database system. The internet address for GSA Advantage is: www.gsaadvantage.gov.

For more information on ordering from Federal Supply Schedules, click on the FSS Schedules button at: www.fss.gsa.gov

Summary Description of Product Listings

Credit Reports

TransUnion Credit Reports are the foundation of any effective information management solution. They extract recently updated information from one of the industry's largest repositories of consumer information and summarize it into a single, convenient form. Through the Credit Report, you receive relevant intelligence to quickly assess a consumer's status, including credit and payment activity, account balances, public record data, and contact information.

A wide range of powerful add-ons and specialized reports also enable users to customize the TransUnion Credit Report to meet specific industry, population, or agency needs.

Archives (Retrospective Analysis)

An Archive Retrospective Analysis validates how well a specific model, multiple models, or characteristics will predict future consumer behavior in a portfolio. It also allows you to:

- Determine the optimal model, or combination of models, to include in your strategies
- Provide valuable insight in determining effective score cutoff thresholds for a specific portfolio
- Help ensure existing risk management strategies meet agency objectives
- Provide a foundation for advanced analytics, including Segmentation Analysis, Benchmarking, Forecasting, and other sophisticated TransUnion analytic services

Collections Prioritization Engine (CPE)

Collections Prioritization Engine applies an advanced scoring model to your account holder's key credit characteristics, helping you segment accounts based on the likelihood of recovery. You can set your own cutoff strategies and apply the most efficient treatments to each set of accounts.

Collections Prioritization Engine takes your accounts via batch processing and delivers easy-to-read results within 24 hours. This not only helps you focus your collections efforts correctly, it offers you essential contact data and isolates accounts which require special treatment.

Data Breach Services

TransUnion offers a suite of services around data breaches, credit monitoring, fraud protection, and fraud response. Our credit monitoring service includes, at a minimum, the following features: unlimited access to TransUnion Credit Report; unlimited access to VantageScore® credit scores and analysis; 24x7 credit monitoring alerting individuals to changes in their credit report; online credit dispute access; toll-free access to credit specialists; up to \$1,000,000 in identity theft insurance with no deductible (certain limitations and exclusions may apply); unlimited toll-free 24/7 access to identity theft insurance specialists; unlimited access to credit management and identity theft prevention resources; and, identity restoration services available for victims of identity theft.

All agencies will receive activation codes which can be used to turn on credit monitoring services. The government agency will distribute these codes to individual employees or consumers that might be potentially impacted by a data breach. The individuals then use their code to sign-up (90 day enrollment period) for the credit monitoring service. This sign-up can be accomplished by visiting the website www.transunionmonitoring.com and entering an individual activation code. At this point, enrollees will obtain instant unlimited access to TransUnion's credit monitoring service for the length of time selected by the government agency.
